#### PLEASE NOTE:

\* Recycled water use is not restricted by the Water Use Ordinance

Irrigation checks are conducted during the day when staff is on duty.

Parks are not watered on weekends for a specific reason: if there is a break in the water lines, staff are not available to identify and repair the problem. A broken line on a weekend will result in excess water run-off for longer periods of time.

August and September: Park Services conducts ballfield renovations during the months of August and September by either reseeding fields or replacing sod. These ballfields require watering daily for the first two weeks at a frequency of 2-3 times per day. This is done to ensure seed germination and/or proper rooting of the sod.

Staff will monitor water use closely: areas that water runoffs are evident will be evaluated and adjusted to water with more frequency, yet less times per frequency to prevent runoff (as we do at Montrose Mall).

Irrigation utilizing rotary sprinklers are set to water for longer periods of time per cycle to allow ample water coverage.
